

ScannX® Document ScanCenter

Replace your copier with a low-cost, self-service document scanning solution.

The ScannX Document ScanCenter is comprised of a Visioneer D40 color sheet-fed scanner and the ScannX ScanPerfect software. It is the industry's most powerful and easy-to-use self-service document scanning solution for library patrons and staff.

The Document ScanCenter automatically crops, straightens and orients each page. The system also protects privacy and confidentiality by only saving the scanning statistics and not any identifiable session information. Users can also password protect any scanned document and an additional authentication module can prevent anonymous emails from being distributed.

Keep your Library Green

The system also helps you meet your environmental goals by allowing your scans to be sent to or stored on a variety of media, rather than printing. The Book ScanCenter Standard Edition software includes output to email, GoogleDrive, mobile devices, network, print, USB drive, and Wepa. Add-on options include Article Exchange, Box, Dropbox, fax, ILLiad, Odyssey, Office 365, OneDrive, print from cloud or USB drive, print from mobile device, Tipasa, and World-Share ILL. Translation into multiple languages is also available.

Scannalytics®

Scannalytics tracks usage statistics, enables features remotely, and distributes updates. IT and Accounting departments can use these reports to manage and optimize asset utilization and department chargeback fees.

Unmatched OCR Accuracy

The Document ScanCenter is integrated with the ABBYY® Fine-Reader Engine for unmatched accuracy. ABBYY's multilingual document recognition engine automatically detects English, French, Italian, German, and Spanish languages.
