

Scannx Book ScanCenter Elite

The High-Volume, High-Speed, Easy-to-Use Scanning Solution

The Scannx Book ScanCenter Elite is designed for high-volume high-traffic areas where productivity and image quality are paramount.

The state-of-the-art, book-edge unit can scan an 11x17" page in 200dpi black and white in under 5 seconds. Now libraries can replace their toner-based copiers with this more environmentally-friendly option.

Touchscreen scanning is provided to:

- Dropbox
- Email
- Fax
- FTP
- Google Drive
- ILLiad
- Mobile devices
- Network folders
- OCLC Article Exchange
- Odyssey
- Printers
- USB Drives

The patented design of the Book ScanCenter protects the spine of the book from damage to extend its life. The book page lies flat on the glass, and the full image of the page is captured without distortion. The system can automatically scan a stack of up to 11x17" documents and automatically crop, straighten and orient each page.

The system also protects privacy and confidentiality by only saving the scanning statistics and not any identifiable session information. Users can also password protect any scanned document and an additional authentication module can prevent anonymous emails from being distributed.

Scannalytics®

Scannalytics tracks usage statistics, enables features remotely, and distributes updates. IT and Accounting departments can use these reports to manage and optimize asset utilization and department chargeback fees.

Unmatched Accuracy

The Book ScanCenter is integrated with the ABBYY FineReader Engine for unmatched accuracy. ABBYY's multi-lingual document recognition engine automatically detects English, French, Italian, German, and Spanish languages. The home screen also provides contrast and magnifying tools for the visually impaired.
