

CBA100 Coin and Bill Acceptor

CBA100 Coin and Bill Acceptor

The Scannx CBA100 is a new, revolutionary, low-cost, coin and bill acceptor integrated with Scannx's Cloud Services to enable patrons to pay for Scannx's digital document services.

Facilitating Payments

This unique pay station saves money and valuable floor space by facilitating patron payments at multiple equipment locations to pay for various document services.

Patrons deposit coins and/or bills (U.S. currency) into the CBA100, and receive an account code (via print or text message) to pay for scanning, faxing and printing services. Patrons enter the account code into any Scannx system on the school's campus to pay for Scannx document services. Charges are deducted against the patron's account balance until account balances are no longer sufficient to cover additional services. At that point, the patron can either create a new account or can put additional cash into his/her existing account.

Reliable Reports

Library staff administrators can log into Scannx's Cloud Services to receive daily, weekly, and monthly reports by Scannx device on cash collected, document services purchased, and any remaining balances by account. Unclaimed funds are the property of the library, and may be used in conjunction with its published policy.

Specifications

The CBA100 measures 20" high x 5" wide x 7" deep, weighs 14.5 lbs (empty), and needs to be connected to a power outlet. Connections include 2 USB 2.0 ports and wired/wireless Ethernet. It holds a maximum of 500 bills

and 8 lbs. of coins. The CBA100 lists for \$1495 and may be acquired at no charge under a revenue sharing model with Scannx. It includes a 1 year manufacturer's warranty which may be extended for up to 5 years. The unit is available in black, white, blue, red and green.

*The CBA100 may be FREE
when using the Scannx
revenue sharing model.*
